

**C.P.D. Presentation**

**Engineering v's Pseudomonas**

Pseudomonas aeruginosa in building services is still an evolving concern and a subject which we have looked at closely. The presentation is entitled "Engineering v's Legionella, Pseudomonas and the retrograde contamination of domestic water services by micro-organisms" in which the following question will be posed – "What can engineering bring to the fight against pseudomonas aeruginosa in domestic water services" Specific references will be made to the following:-

- Biofilm formation
- Chemical disinfection
- Surface finish of wetted components
- Material selection
- Water / air interface and tap outlet fittings
- Thermal disinfection
- Summary / Q & A session

The presentation will be provided by Alex Tickle from Horne Engineering.

Attendance at this event may count towards your CIBSE CPD requirement. Certificates of attendance provided on request.
